

Datatrak opens Gozo branch

Datatrak, the geocoding and mapping company, has inaugurated a branch in Gozo employing 25 persons.

The branch was inaugurated by IT and Investments Minister Austin Gatt, who said this was the third services company to open in Gozo in recent months after the HSBC service centre and 6PM IT company.

Joe Fenech Conti, Managing Director, said Datatrak planned to expand its presence abroad and the Gozo branch would help in this process through its research and development role.

Dr Gatt said this new investment in Gozo was being made thanks to incentives announced by the government.
